EDUCATION

Harvard University

Bachelor of Science in Mechanical Engineering

Cambridge, MA

Expected May 2028

- **GPA:** 3.8/4.00; **SAT:** 1520 (790 Math); **International Baccalaureate Diploma (High School):** 42/45
- **Activities:** Harvard Financial Analytics Club, Harvard Asian American Dance Troupe, Club Basketball
- **Relevant Coursework:** Probability with Engineering, Computing with Python for Engineers, Computer-Aided Machine Design, Mechanical Systems, Digital Fabrication

WORK & LEADERSHIP EXPERIENCE

UBS

Incoming Investment Banking Analyst

New York City, New York

June 2027 – August 2027

Excavator Robot Fabrication Team

Assistant

Cambridge, MA

August 2025 – Present

- Selected as team member, formulated designs for a robot which tills and plows soil into crescent shapes to maximize water retention in arid lands. Constructed CAD (Fusion) models of these designs, tested mobility paths
- Fabricated and evaluated robot end-effector prototypes, retrofitting garden tiller tines and 3D printing custom plow shapes for proof-of-concept and pilot testing

Boston Consulting Group

Case Team Shadow, The Filipino Family

Taguig, Philippines

July 2025 – August 2025

- Wrote code to extract insights on family spending behavior at malls and groceries from large survey datasets, gaining familiarity with data structures, survey design, and Excel formatting. Performed sanity checks to ensure insights were reasonable and accurate
- Created graphs and slides (ThinkCell) to highlight and present key insights about how factors like age, gender, family structure and size, affect decision making within the average Filipino family

Hebenstreit GmbH

Summer Intern, Engineering Design Team

Frankfurt, Germany

June 2025 – July 2025

- Designed parts using CAD software (Creo) for wafer cracker production lines and modeled dummy production lines to provide 3D visuals for clients
- Digitized and updated the design team's old paper engineering drawings by recreating them in CAD. Modified sheet metal engineering drawings for CNC laser cutting to meet updated client specifications

Thinking Machines Data Science Inc.

Data Strategy Intern

Taguig, Philippines

June 2022 – June 2023

- Researched and collected data for a tech consulting firm, ran test scripts for a United Nations Sustainable Development Goals website. Helped design the Thinking Machines x UNICEF Artificial Intelligence for Development research bank [website](#)
- Sourced and cleaned open-source data sets to train a machine learning model to identify areas experiencing poverty based on road and light density in satellite map images, which was later used by UNICEF to optimize relief efforts in those areas

University of Pennsylvania

Jerome Fisher Management & Technology Summer Institute

Philadelphia, PA

July 2023

- Designed weightlifting tracker to count repetitions, fabricated it using Arduino, CAD, and 3D printing
- Pitched the tracker as a startup venture to faculty panel including VCs and successful entrepreneurs

Jake's Bread

Entrepreneur

Manila, Philippines

January 2020 – May 2022

- Partnered with Baker John to sell over 12,600 loaves of bread within my neighborhood during the Philippine COVID lockdown, physically delivering the bread on my bike
- Created marketing campaigns including designing and distributing 500 flyers, coordinated multiple customer group chats, and organized own supply chain from bread production pickup to customer delivery
- Managed own pricing, payments, and supplier negotiations to ensure positive cash flow, profited \$1500

SKILLS, ACTIVITIES & INTERESTS

Skills & Languages: Python, Working Proficiency in Mandarin; Conversational Proficiency in Tagalog, SolidWorks & Fusion 360 CAD, Manual Milling

Interests: Sid Meier's Civilization VI, Catan, Poker, Aquascaping, Aquaponics, FT News Briefing Podcast
